

**AM MACHINERY SALES, INC.
FREE STEELMASTER USER TRAINING SEMINAR**

Monday, January 25, 2010

ITINERARY

8:00-8:30 Assemble at AM Machinery Sales' facility

8:30-10:30 Operations training review:
Review setup and operations procedures. Correct setup of the machine including setting the pinch pressure, grinding pressure, abrasive belt and conveyor belt speeds and brush settings. A special emphasis is placed on proper abrasive belt selection and usage. Discussion to include a "how to" section addressing common deburring and finishing issues.

10:30-10:45 Break

10:45-12:00 Maintenance training review:
Review proper methods for maintaining your Steelmaster. Roundtable discussion of common machine problems and solutions with an emphasis on avoiding these problems altogether. Review of common troubleshooting procedures.

12:00-1:00 Lunch

1:00-3:00 Machine Demonstrations in Application Test Center:
This is an opportunity for a hands-on demonstration of the items discussed and questions raised by attendees.
